with high Quality
performance.

Global Advantage

Across Global RCC Chimneys, we pride ourselves on driving rigour, operational excellence, and enhanced customer value. That's why we're placing some big bets on high impact projects that will help increase our speed to market, improve the quality of our services, significantly reduce costs, and drive competitive advantage for our customer and our company. It's called Global Advantage, and it is changing the way we do services significantly. A rigorous, data driven, problem-solving methodology that identifies the drivers of variability in a process and eliminates defects.

Global RCC Chimneys

Global RCC Chimneys Constructions is one of the premiere construction company, engaged in the construction of RCC Chimneys and Refractory works. GRCCC is a unit Konark Group which has a track record of 20 years of rich and varied experience in execution of landmark projects across the length and breadth of the Country. GRCCC has successfully executed several RCC Chimney construction projects on time. We has been certified for following a well defined quality management system.

Global RCC Chimneys has been entrusted with construction of high value projects for core organizations. Drawing from the experience of promoters, GRCCC has gained specialization in constructing RCC Chimneys within the stipulated time frame. GRCCC has successfully completed many RCC Chimneys construction projects in India. The expanding list of satisfied clients reflects our ability to execute challenging projects, despite all odds, difficult weather or terrain has been no deterrent to our team which has delivered consistently and brought accolades to the company.

Performance

RCC Chimneys can resist factors affecting deterioration of concrete such as hot weather, rapid fluctuations in temperature, alkali silica reactions, chloride & sulphate attack etc. These RCC Chimneys are capable of maintaining high sustained stresses for a much longer durations with high modulus of Elasticity, low creep and low shrinkage and thus meets the performance level expected.

Environment

We are continuously developing methods for constructions of chimneys from design to final delivery and ultimately to the end-of-life disposal such that environmental standards and requirements are satisfied. Our aim of sustainable construction is to develop methodologies for transforming materials with objectives of reducing emission of greenhouse gases.

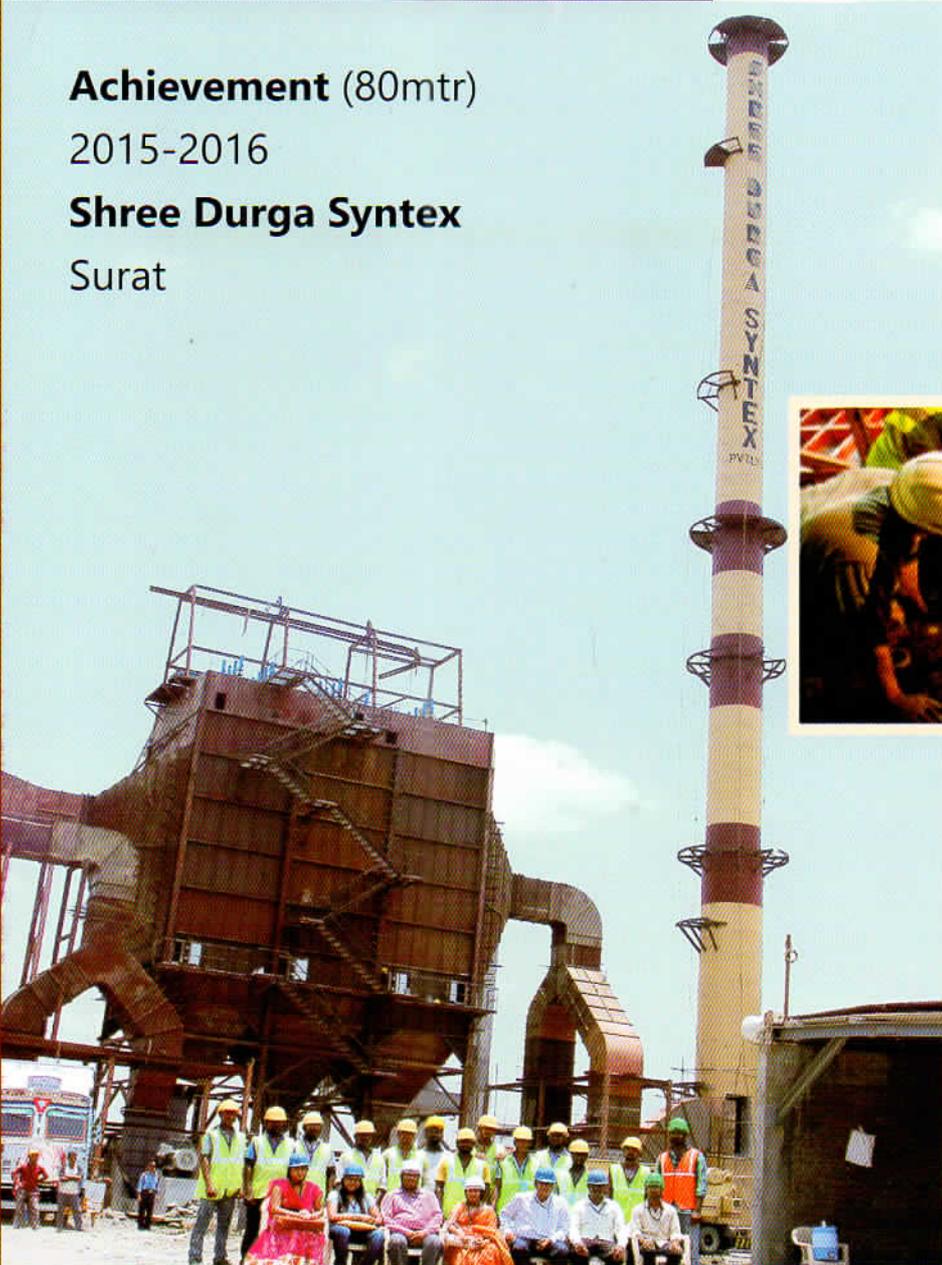

Achievement (80mtr)

2015-2016

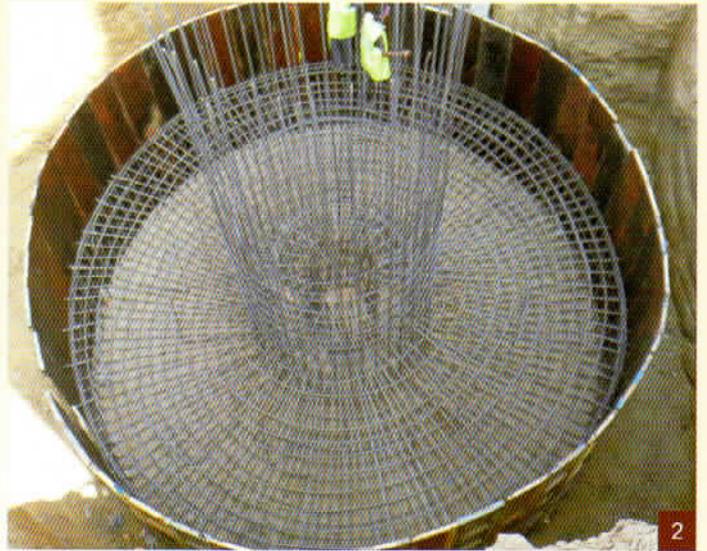

Shree Durga Syntex

Surat

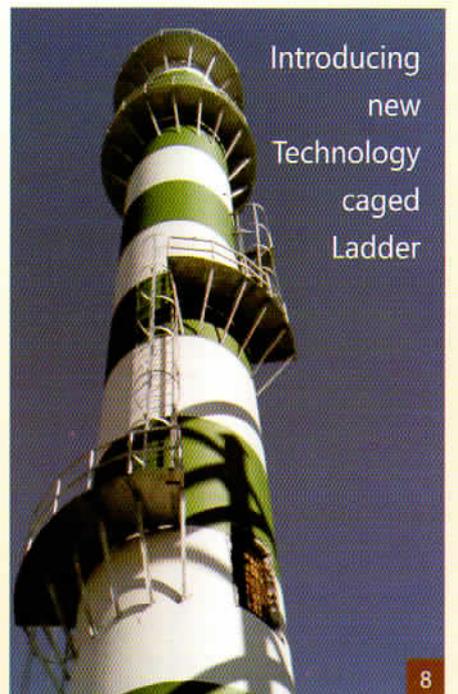

Planning

All Construction projects require planning and they often require huge expenditure. Our experienced engineers understand the importance of planning. Our commitment is to make the planning function work effectively and to reduce the construction cost and improve performance. A remarkable feature of our work approach has been our ability to tailor..

we are also introducing New Technology When the Fuel used has sulphur content and when used in combination with Wet scrubber, AR Brick with AR mortars are used Instead of Fire Bricks. Which will protect the Chimney from acid effect and protect the Concrete wall of chimney for more longer time.

Our Prestigious Clients

We are the top construction company of RCC Chimneys in South India, based out of Andhra Pradesh. Apart from Construction of RCC Chimneys we are also specialist in constructing and providing services in Boilers, Furnace, Thermo Pac. We also provide services like maintenance of Chimneys, Boilers, Furnace, Thermo Pac. We have successfully completed many projects in many state of India. We research, evaluate and plan for all the factors that will affect design and construction. We are top-listed as one amongst the best industrial Chimney Manufacturer in Andhra Pradesh, India. We can provide Air-gap in between lining and RCC with vents to protect the RCC chimney for particular cases. We can provide plat forms at different heights for pollution check, warning lights and maintenance of the chimney.
